- PHP assessment in linkedin.

ACADEMIC EXPERIENCES

- Teacher assistant**
Semnan University | September 2018 – February 2019
- I was a TA of the two fundamental programming and advanced programming courses which were presented by Dr.Hamid Nasiri.
 - I was a TA of the fundamental programming course presented by Dr.Mohsen Hajighorbani.

MY OWN PROJECTS

- My smart room**
August 2020
- I developed a complete IoT project. In this project, I controlled the lamps and ceiling fan of my bedroom with a web app. ([link](#))

PROFESSIONAL EXPERIENCE

- Instructor**
Faradars | December 2019 – September 2020
- Teaching how to implement Juila sets fractals with C++ in opencv library.
 - Link : faradars.org/instructors/nadali-khalili
- Backend developer**
Basir Andishan | August 2021 – May 2022
- VOIP R&D
 - Develop Xenotic GPS tracker web application.
 - Xenotic is a car tracker platform. This platform is developed by Basir Andishan company. I made this website introduces this platform and the served services. (xenotic.ir)
 - I developed the xenotic paltform and added some features to it. I added Neshan map in addition to the Google map so the users can switch between Google map and Neshan map to use the services. I'm also made it multilanguage. (<https://xenotic.app/login>)
- Laravel developer**
Aria Tech | May 2022 – September 2022
- AMCM (amcm.us)
 - Added some features to the admin panel with the Sweetalert Laravel package.
 - Setting up LMS with Adobe connect APIs.
 - Develop a shopping center with a complete dynamic authorization that can restrict each user. (Unfortunately the project was not deployed and was canceled by the product owner)
- Backend developer**
Sabim Company | May 2022 – September 2022
- Panel admin
 - Added some APIs to the admin panel.
 - Car tracker
 - I set up the MQTT broker on the server and program it with Golang, so the server can communicate with GPS devices and vice versa.
- Note: This company unfortunately was bankrupt and all the projects were suspended.
- Full stack developer and Team lead**
Teamvokala Company | Jan 2023 – Oct 2023
- Introduction law office (teamvokala.com)
 - Introduce all the services which the business owner was prepared to serve.
 - I developed this site with Tailwind by full-stack Laravel.
 - Lawyer platform
 - I'm managing the development of a web application with React and Laravel. (app.teamvokala.com)
- Backend developer**
Frahosh Company | Mar 2023 – Sep2023
- Frahosh (frahosh.com)
 - I develop the server side of this platform with Laravel.
 - Other projects
 - This company takes on some outsourced projects and I and my teammates as backend developers handle the server side.

MY OWN PROJECTS (CONT.)

Smart distribution basic commodities in Ejtehard country.

July 2021

- I accepted to implement a platform. In this web application malls and shops can control the basic commodities purchases of people who are authenticated by their personal id. ([link](#))

Call center (VOIP)

Jun 2022

- As my bachelor's project, I bought a VPS and installed the CentsOs on it. I configured it with the Issable call center and the firewalls so users can make calls and send voice mails to each other on the SIP protocol on their softphones.
- I developed a web application with Laravel that services users with a Telegram bot and send notifications by SSE protocol to their web application. The call information such as duration, receiver, call maker. time and even the voicemail files are observable with the web app and reachable by their Telegram.

PROFESSIONAL EXPERIENCE (CONT.)

Full stack developer and product manager

Rahnamayebimeh Company | Sep 2023 - Mar 2024

- This company's business is about insurance.
- There were three main projects that users, admins, and agents used them.
- The user panel was developed with Next.js and I added some filed insurances and some features. ([link](#))
- The admin panel was developed with React. I added an SMS panel, a payment gateway manager, a CMS for managing the content of the user panel, and some other cool features to it. ([link](#))
- The server side of this platform is on the Codeigniter (PHP framework). I added web services for all mentioned featured for these web applications.
